NEWS:

- New model added
- Replaces product information SZ 052_05_11

Product description

The M Performance handbrake handle with Alcantara combines sporty design with comfort thanks to its high quality open-pore carbon and Alcantara materials. The blend of materials coupled with the silver-grey cross-stitching means that the handbrake handle offers a new, unmistakable dimension in terms of its look and feel.

Sales features / benefits

- High-tech material that's a joy to touch: This completely new technology offers direct contact with the **high-tech material of carbon fibre**. The carbon fibre is sealed with a special filler and then finished with silk matt protective paint. The structure of the carbon fibre remains open and tangible, creating a fascinating feel.
- **Better feel and handle:** Alcantara offers a consistently pleasant touch under all temperature conditions.
- The sporty and sophisticated design, with its **silver-grey cross-stitch seam** and open-pored carbon, perfectly matches the M Performance look.

Competition comparison

BMW is the only manufacturer currently to offer a handbrake handle in open-pored carbon. The high-quality material mix with Alcantara is also unique to date.

Cross-selling

The product is ideal for cross-selling with the following products:

- M Performance gearshift lever knob with Alcantara gaiter
- M Performance Alcantara steering wheel and carbon finisher
- M Performance carbon / Alcantara interior strips
- Carbon M Performance Gear Selector Switch Trim
- M Performance gear selector switch centre console finisher

These products are also finished in the high-quality material mix of Alcantara and open-pored carbon and therefore complement each other perfectly.

Content / relevance

Please note that this product information is intended solely as prior information regarding new products.

Before ordering, always check the specified part numbers in the EPC. Only the EPC provides the information that should be taken as valid and current.
