Product description

The BMW LED luggage compartment light is the first light developed especially for the luggage compartment of BMW saloon cars and produces 5 times more light than the standard lighting. The optimised light-directing optics guarantee the best possible illumination of the luggage compartment. As a result, the luggage compartment is adequately illuminated without any additional source of light even in poorly-lit garages or multi-storey car parks.

Sales features/benefits

- The LED luggage compartment light generates **5 times more light** than the standard lighting.
- State-of-the-art LED technology coupled with **optimised light-directing optics** guarantee a much **better distribution of light** in the luggage compartment.
- The product is the **first luggage compartment light** that has been developed in terms of its lighting technology especially for the luggage compartments of saloon cars.
- **Simple to install:** the light can be installed by the customer in no more than five minutes.
- The light has been developed especially **for all BMW saloon cars**, however it is also suitable for use in touring and X vehicles (see EPC instructions).
- **Harmonious shape, high-quality materials and optimised functionality:** the combination of white plastic, a crystal-clear lens and brushed aluminium is extremely high quality, perfectly matching any BMW. The back-lit BMW LED logo is an additional eye-catching feature.

Competition comparison

- BMW is currently the only supplier on the market to offer LED lights with this light-directing technology or these light-directing optics.
- The LED luggage compartment light offers an otherwise unique, excellent level of evenness in terms of the luggage compartment's illumination.
- As an Original part, only the BMW luggage compartment light offers the perfect fit of both shape and size, as well as perfect technical coordination with the BMW on-board electrical system.

Complete price package

For a detailed tender preparation, find the complete price package on the KSD DVD.

Please refer to your price system or the latest price publications for the latest prices.

BMW LED luggage compartment light

E38, E39 (Saloon), E60, E65, E66, E67, E81, E82, E84, E87, E90, E92, E93, F01, F02, F03, F04, F10, F18, F20, F21, F22, F30, F32, F33, F35, F80, F82, F83

Functionality

- The light of the three high-performance LEDs is distributed evenly into all corners and onto the surfaces of the luggage compartment thanks to the three special optics. In contrast to an opal lens, this provides the ideal direction for the light.
- A mean lighting intensity of $E_m = 100$ Lux is achieved on the floor of the luggage compartment (standard light $E_m = 20$ Lux).
- The colour temperature (Tf) is 5700 K, light colour: daylight white. Whereas the standard light offers a warm white light colour and a Tf of 2700 K.

Promotion

- The biggest impact can be made with a live demonstration on the car at the POS (Point of Sale).
- The light's high-quality design makes it ideal for showcasing in glass cases in the showroom.
- The product is supplied in appealing showroom packaging.

Cross-selling

The product is suitable for cross-selling with the BMW LED interior light package and BMW LED interior light, set of 2 (C5W)

BMW LED interior light package, set of 4	63 12 2 212 787
BMW LED interior light package, set of 10	63 12 2 212 788
BMW LED interior light, set of 2 (C5W)	63 12 2 351 265

Supplied package

- BMW LED luggage compartment light including connecting cable
- See EPC for details of the kit's contents.

Technical information

- Mean lighting intensity:
 $E_m = 100$ Lux (standard light $E_m = 20$ Lux).
- Colour temperature: TF=5700 K
- Dimensions: installation dimensions same as standard light, 3 mm thicker than standard lens due to the special lighting technology and tilted BMW LED logo.
- Weight = 27g
- Coordinated with the BMW on-board electrical system, suitable for all BMW vehicles. Suitable for all plugs and polarities thanks to Z0 coding of the plug and rectifier circuit.
- Associated work: No vehicle coding is required.
- Power consumption: 2.5 Watt
- The light-directing technology is optimised for the installation position in saloon luggage compartments with central installation underneath the parcel shelf.

Note

Important installation information: the product must be installed so that the logo points backwards towards the tailgate and so that the BMW LED logo can be read.

The light can also be fitted to other models (e.g. touring and X vehicles) and also brings significantly more light to the loading space. The lighting technology delivers its best performance in saloon cars, however. ◀
