

Original BMW parts Anti-theft alarm system retrofit kit X5 (F15)

NEWS:

- New product launch

Product description

The Original BMW anti-theft alarm system offers customers additional security alongside the electronic immobiliser and central locking that come as standard.

The anti-theft alarm system protects the car against unauthorised accesses, such as

- Opening of the bonnet / tailgate / doors
- Access to the interior (compartment protection)
- Wheel theft
- Towing
- Disconnection of the battery

As soon as any attempt at unauthorised access to the car is made, the anti-theft alarm system activates the hazard lights system and triggers an audible alarm. The anti-theft alarm system is armed and disarmed via the remote control key and a radio signal or with the mechanical key in the driver's side door lock. The anti-theft alarm system, which is quick and easy to install, is an ideal upgrade product for the standard immobiliser and central locking systems. For customers who live in areas with high crime rates and customers with recent, high-value models of used cars, this retrofit offers greater security.

Sales features

- Optimised vehicle integration of all monitoring systems.
- Optimised vehicle coordination and reliability.
- Possible insurance premium discounts for car insurance policies.
- Wards off unauthorised access with a warning light on the interior mirror.

Supplied package

- Retrofit wiring harness
 - Emergency siren with tilt switch
