Product description

The new bicycle carrier for the trailer tow hitch is the successor to the LED carrier bearing part No. 82 72 2 155 590. The bicycle carrier is only fitted to the ball head on the towing hitch, can be folded down to a very small size and, in addition to the transport of normal bicycles, also allows the high loading and transport of e-bikes.. 2 bikes can be transported as standard. An extension kit for a 3rd bike is also available.

Sales features/benefits

- New, modern BMW design.
- Satisfies the strictest quality and safety requirements.
- Weight optimisation compared to the previous bicycle carrier.
- High loading (2 x 30 kg bicycle weight) => any bicycle (from racing bikes to e-bikes) can be transported.
- Lightweight yet stable and extremely durable.
- Simple installation.
- Simple handling (the wheels are secured using a ratchet system; single-handed operation of the ball head clamp system).
- Fold-down function for easier access to the rear.
- Reinforced, folding supporting clamp with quick-close fasteners and oval tube made from aluminium.
- Fold-out wheel moulds & lights.
- Adjustable lights cover vehicle widths (without mirrors) or bicycle lengths of up to 2000 mm (also suitable for F01 and F07 cars).
- Includes universal registration plate holder.

Material

- Ultra-stable construction made from steel, aluminium and plastic components.
- Plastic parts made from highly durable, UV-stabilised plastic.

Suitable for all series

Exhaust heat shield for x models

Supplied package

- Bicycle carrier on the trailer tow hitch for 2 bicycles.
- Installation information.

See EPC for details of the kit's contents.

Available as additional accessories:

- Extension for 3rd wheel rail.
- Black transport bag (not suitable for use with the 3rd wheel rail fitted).
- Sectioned approach rail for easier loading, including suitable bag.
- Various spare parts collections are available in the EPC.

Technical information

Dimensions (L x W x H) without the 3rd wheel rail fitted:

- Folded approx. 600 x 600 x 250 mm
 - Ready for loading approx. 600 x 1140 x 740 mm
- Weight without the 3rd wheel rail: approx. 14 kg
- Wheel rail gap: 220 mm
 - Bicycle length: (with central alignment) up to 1250 mm centre-to-centre distance (front axle to rear axle of bicycle)

Safety note

Loosely-fitted bicycle components (e.g. battery pack, panniers, baskets, child seats, etc.) must be removed before setting off!

Content / relevance

Please note that this product information is intended solely as prior information regarding new products.

Before ordering, always check the specified part numbers in the EPC. Only the EPC provides the information that should be taken as valid and current.

Before fitting the carrier on the trailer tow hitch, the relevant cleaning materials must first be used to ensure that the ball and the clamp system are free from oil and grease.

By fitting the 3rd wheel rail and the resulting longer lever arm, the overall weight-carrying capacity of the rear carrier reduces from 60 kg to 52 kg. ◀

Note

For X5 and X6 or for cars with high-riding exhaust system: A heat shield is provided to protect the car's tyres from hot exhaust gases. This can be fitted by the customer on both sides, covers various different sizes of wheel and the rear carrier's folding function is retained. ◀

Availability/EPC DVD

From 04/2012

Installation time

When fitted by the customer, around 5-10 minutes for the first time. Around 2 minutes are required for each subsequent fitting.
