

Original BMW Accessories Child Restraint System Junior Seat Group 2/3

NEWS:

- Product information revised

Product description

The new BMW Junior Seat 2/3, with its inclination matching the car seat, has been designed especially for children weighing between 15 and 36 kg and measuring 95 - 150 cm tall, making it ideal for children aged between 3 and 12 years. The seat is secured using the car's three-point seat belt. The seat can also be secured using the integrated connectors to the ISOFIX anchor points in the car to ensure greater stability. Both seats have integrated airpads (patented), which provide additional protection for the head in the event of a side-on collision. In everyday use, the airpads are soft and comfortable.

The customer can choose between the sporty, classic look of the seat in black/anthracite or the sporty, progressive design in black/blue. The BMW logo is printed on the outside of this high-quality seat. Its position has been set so that it is clearly visible outside the car too.

Sales features / benefits

- **Outstanding safety:** in extensive crash tests, the BMW safety standards which exceed legal requirements were all met.
- All BMW child seats satisfy the **European standard** for child safety devices ECE R44.04.
- The **high side panels** in the head / shoulder area and the additional **airpads** ensure the **best possible side protection**.
- Superlative comfort: the **patented, combined height and width adjustment** can be operated single-handedly. A body size scale makes the height adjustment process easier. The seat "grows" with the child thanks to its adjustability, ensuring a long service life (for children from around 3 to 12 years old, 15 - 36 kg).
- The **patented**, securely locking **shoulder strap guide** can also be operated single-handedly.
- **The backrest inclination** (90° - 120°) adapts perfectly to the car seat.
- **Excellent seating comfort:** the upholstery, which features comfort foam, is particularly generous. The seat has comfortable armrests on both sides.
- Easy to transport: The **fold-down function** of the back rest allows compact transport outside the car too.
- Covers can be **removed** and **washed** at 30°C.

Junior Seat Group 2/3

Competition comparison

- Unlike conventional child seat crash padding, the patented airpads are soft and comfortable in everyday use.
- ISOFIX technology gives the seat additional stability.

Functionality

BMW Junior Seat Group 2/3

- The BMW Junior Seat Group 2/3 offers optimum side protection thanks to its raised side panels in the head / shoulder area.
- The patented airpads located in the head and shoulder area offer enhanced protection thanks to energy absorption in the event of a collision.
- The seat's height and width can be adjusted single-handedly and features a visible body size scale to ensure the correct height setting.
- The seat can also be connected via integrated connectors to the car's ISOFIX anchor points, keeping it more securely in position.
- The shoulder strap guide, which can be operated single-handedly and is self-locking, makes operation easier and keeps the belt in position.
- The seat can be folded down for compact transport.

Child Restraint System

Junior Seat Group 2/3

Airpads

- Integrated airpads (patented): the static air cushions are made from the same tear-resistant material as car airbags and surround a space filled with air and foam. In the event of a side-on collision, the air the airpads contain is forced out very rapidly and flows away in a defined manner through the fabric cover. This absorbs the crash energy just like an airbag, which means that the airpads act as head impact protection between the child and the child seat. Unlike conventional child seat crash padding, the airpads are soft and comfortable in everyday use.

Supplied package

- BMW Junior Seat 2/3
 - Operating instructions
- See EPC for details of the kit's contents.

Technical information

- BMW Junior Seat Group 2/3 for children aged between approx. 3 and 12 years, approx. 95-150 cm tall and weighing approx. 15-36 kg.
- Weight of the BMW Junior Seat 2/3: 6.3 kg.
- Direction of installation: forward-facing.

Safety note

Please make the customer aware of the following points:

- if a child restraint system is used on the passenger seat, the passenger airbags must be deactivated. Otherwise there is an increased risk of injury to the child, even in the child restraint system, if the airbag is deployed.
- On E70 and E70 LCI cars with S44BA, the installation of child restraint systems on the third row of seats is not permitted.
- To position the seat in the 1 Series convertible (E88) on the 2nd row of seats, the headrests must be removed. ◀
