

## Original BMW Accessories Sport brake retrofit kit X5 (F15)

### NEWS:

- New product launch

### Product description

The retrofit kit is the first BMW M Performance sport brake available for the X5. The blue-painted brake callipers, which features a coloured, printed-on BMW M logo at the front, look especially stylish thanks to the open rim design.

### Sales features/benefits

- The larger, **internally-ventilated 19" BMW M Performance lightweight brake disks** ensure **improved thermal capacity** and therefore for greater braking performance under extreme conditions.
- During frequent changes of fast acceleration and braking, the **braking performance** (good responsiveness and thermal resilience) is **maintained for longer**.
- The **attractive appearance** of the **brakes painted in M Performance blue** highlights their sportiness, especially when used in conjunction with alloy wheels with an open wheel design.
- The brakes' **low weight** means low unsprung masses.
- The Sport brake is an Original BMW product that has been tested during development and which therefore satisfies all of BMW's standards in terms of performance and quality.

### Competition comparison

The M Performance Sport brake offers the best price/performance ratio in a comparison of competitors.

### Functionality

4-piston aluminium brake calliper on the front axle (including printed colour BMW M logo) and aluminium combination sliding calliper on the rear axle painted in blue.

### Promotion

The installation of the BMW M Performance Sport brake in a showroom car enables the product to be displayed effectively at the POS (Point of Sales).

Sport brake retrofit kit

### Supplied package
