Product description

The trailer tow hitch with electric pivot-mounted ball head can be retracted and extended fully automatically at the press of a button.

The trailer stability check, a system integrated into the DSC, is activated when the rear socket is occupied.

Sales features/benefits

- Effortless swinging in and out at the press of a button.
- Ball head invisible when swung in.
- No dirty hands and no arduous attachment or removal and locking of the ball head.
- Can also be used for attachment of a bicycle carrier.

Supplied package

- Electric pivot-mounted trailer tow hitch
 - Set of electrical components
- See EPC for details of the kit's contents.

Technical information

- Trailer loads of up to 1,800 kg
- Nose weight of up to 75 kg
