

Original BMW Accessories BMW antenna amplifier for mobile telephones

NEWS:

- New product

Product description

The antenna amplifier ensures excellent mobile phone reception inside the car, guaranteeing constant availability. Customers in areas with poor network coverage will especially benefit from this.

The antenna amplifier will only work in combination with a snap-in adapter with a mobile phone connected to it. It is compatible with every snap-in adapter.

Sales features / benefits

- Good connections: The antenna amplifier ensures **maximum connection reliability and stability**. In areas with poor reception and poor network coverage, such as in rural areas or in thickly forested areas, the call connection is maintained.
- Perfect interaction: the antenna amplifier **improves** the snap-in adapter's reception **even further**.
- The connection to the external antenna **reduces** the amount of **radiation** inside the car.
- The improved reception means that data can be **downloaded** significantly **faster**.
- The antenna amplifier ensures fault-free communication via **UMTS/GSM**.
- **Simple installation**: installation of the amplifier in the car is quick and straightforward. The exact steps can be found in the installation instructions.
- The antenna amplifier can be used **throughout the EU** (EU/R&TTE licence). See country information on page 2.

Functionality

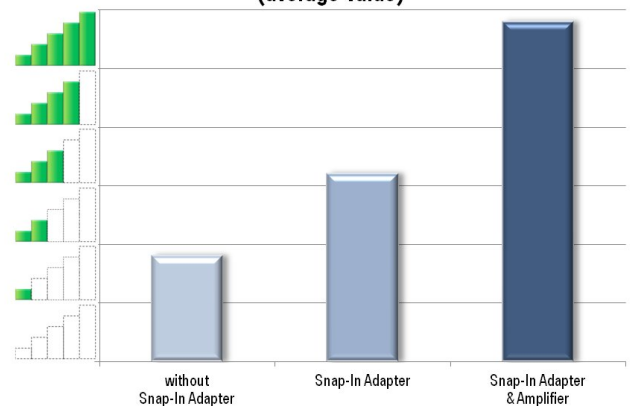

- The antenna amplifier is a control device that is installed invisible in the car's centre console below the base plate (mount for the snap-in adapter).
- The electronics in the antenna amplifier have been perfectly harmonised with the BMW models and their on-board electrical systems.
- The antenna amplifier compensates all of the losses that occur in antenna cables and as a result of car shielding.

Content / relevance

Please note that this product information is intended solely as prior information regarding new products.

Before ordering, always check the specified part numbers in the EPC. Only the EPC provides the information that should be taken as valid and current.

Mobile Phone Reception (average value)

Average reception level on the BMW test track

Promotion

The product is supplied in attractive showroom packaging and is therefore very well suited for decorative positioning in the showroom.
