### Product description

Innovative and unmistakable design in the material of motorsports: open-pore carbon fibre combined with Alcantara. This completely new technology offers direct contact with the high-tech material of carbon fibre. Just like on the painted carbon finishers, a true layer of carbon fibre is applied to the plastic backing. In contrast to the polyester lacquer-covered version, the carbon fibre in this instance is sealed with a special filler and then finished with a silk matt protective lacquer. The structure of the carbon fibre remains open in this case and can be felt. Mixed with Alcantara, a material also used exclusively in the construction of sports cars, the new M Performance interior finishers offer a completely new, unmistakable dimension in terms of touch and feel in the interior of the car.

### Sales features/benefits

- New design made from real carbon fibres. The open-pored structure can actually be felt, making it a high-tech material with a tactile appeal.
- Clear differentiation from the standard strips of all lines or basics. True motorsports feel in the interior.
- Interesting mix of materials involving Alcantara and stitched M Performance branding on the Alcantara passenger finisher.
- Coherent overall appearance in combination with other M Performance interior products such as the steering wheel, gearshift knob and handbrake handle with gaiters, which are also made from the open-pored carbon and Alcantara mix.

M Performance Interior Strips in Carbon/Alcantara

### Material

- Open-pored carbon fibre.
- High-quality Alcantara.

### Supplied package

- Driver and passenger finisher made from Alcantara with carbon decorative strip (M Performance stitching on the passenger side).
- 2 or 4 door handles made from carbon (three or five-door cars).
- Centre console made from carbon.

### Technical information

- Can be installed in all F20, F21 cars with SA 534 (automatic air-conditioning system).
- Can be installed in all F22, F23 and F3x cars.
